

COLLEGE OF SAINT MARY

Enterprise Applications Developer

Join Our Information Technology Team

At College of Saint Mary, student success is at the heart of everything we do, and we seek an Enterprise Applications Developer to design, build, and support the integrations and applications that keep our campus systems running smoothly. This role sits at the intersection of software development, systems integration, and collaboration – and that work makes a real difference.

Does Your Education and Experience Include:

- A bachelor's degree.
- At least three years of experience in software development and systems integration
- Experience with Python, PowerShell, C#, or another modern programming language
- Experience working with APIs, SQL, and version control
- Experience building automations or workflows in Microsoft Power Automate or Microsoft Power Platform
- Familiarity with Microsoft 365/Azure/Identity/Entra
- Experience with student information systems or other enterprise systems of record preferred

What You'll Do:

Application Development and Integration

- Design, develop, test, and maintain integrations between CSM's core systems
- Develop and maintain custom software packages, scripts, and automation
- Build and support API connections, workflows, and data pipelines
- Write and maintain SQL queries and supporting database objects

Systems Support and Technical Ownership

- Administer the college's automation servers and scheduled job environment
- Monitor integrations, troubleshoot failures, and support recovery as needed
- Serve as a key technical resource for the CRM platform
- Assist the Help Desk with issues involving custom code, integrations, and data flows
- Maintain version control and documentation for institutional code assets

Collaboration and Migration Support

- Work with staff, faculty, and IT colleagues to translate business needs into technical solutions
- Lead the technical migration of CSM's integration environment as the college prepares for the new student information system go-live in September 2027
- Help ensure integration readiness at cutover and contribute to long-term stability of enterprise systems

Why CSM?

- Mission-driven work. You'll be part of a team united by a genuine commitment to serving students and the broader community.
- Meaningful impact. The systems you support help power the everyday work of the college.
- Great benefits. Full-time employees are eligible for health insurance, paid time off, tuition remission, a 403(b) with employer match, employee wellness time, and more.

Application Process:

Please have a resume, cover letter, and contact information for three professional references, including one supervisor, ready to upload during the application process.

Please apply using the following link: [Enterprise Applications Developer](#)

College of Saint Mary is a Catholic university providing access to education for women in an environment that calls forth potential and fosters leadership.
